

from: Jasmine 3/11/13  
Dear: Margaret waniru Thiga

Hi my name is Jasmine  
your other parnter is in middle-  
school. So I really love your book.  
It's Awesome and I like your  
hand writing and your drawings.  
And I love the savannah  
because many communities  
use grass to bulid thatched  
houses. The Eucalyptus-odorata is  
endangared because human beings  
through logging for wood and climatic  
changes unfavorable to the eucalyptus  
odorata example too much heat  
due to global warming. And the  
scientific name is Eucalyptus  
tereticonis or Eucalyptus odorata.

Your penpal: Jasmine H. ☺
