

Dear, Vallary

How are you? My name is Wendy. I read your book and I thought it was a great book. I enjoyed reading about the Lappet Faced vulture. I also like to swim. My favorite colors are baby blue, red, and hot pink. What are your favorite colors? One characteristic of the Savannas is that, trees are not as tall as in rainforest and do not grow as close together. One behavior of the vulture is that when feeding, vultures maintain a strict social order based on body size and strength of beak. The scientific name of the vulture is *Torgos Tracheliotos*, and the common name is Nubian vulture. I hope I hear from you soon.

Sincerely,

Wendy
