Dear Freyr

How do you do? Hope you are well. First, I liked all that you wrote about the kingsnake. I also like the characteristics of the animal. Infact that was the best snake in the cards you sent. I would like to share some things I like doing.

I like dancing, eating and travelling. My best food is chips and soda. In our school there is Drama and Music Festival. that is why I like dancing. Also I would also tell you about things here. I would like to tell you about the savannah.

Savannah woodland means many grass than trees, and savannah grassland means more grass with

scattered trees. Type of trees and grass and also type of animals browsers, grazerz, leaves carnivore grass.

This are the answers to your lovely questions.

1. Your animal preys on lizards.

2. Your animal lives on grasslands

3. Some of the predators of your animal are hawks, owls,
coyotes, skunks

YOUR DEAR PENPAL,
VALLARI OKALO.

Dear Fryr

Hello, how are you doing? Hope you are well. I loved your book and the animal. To me you are like a long last friend, I have never read an interesting book like yours. I loved the Kingsnake because it prays on other snakes, and I love its colour and its poisonous fluid.

My favorite animal is the Kingsnake, I look forward to see the animal with my own two eyes, Does it live in your homeland, Is it found near the coast? I am sure sure that it decorated the land.

Do you like your wetland? Now I am ready to tell you about my savannah; in Kenya there are two types of savannah in Kenya. Savannah grassland and woodland. In savannah woodlands we find elephant and in grass lands we find zebras and snakes.

In savannah grassland we find more grass that trees and scattered short trees. In savannah, the temperature is high and low amount of rain.

In our savannah it is a home of different types of species such as the big five who are lions, buffalo, leopards, rhino, elephants who are the head of the savannah. I look forward to hearing from you. Yours truly, Allan Justin.

P.S Anyways, for your questions below:

What does your animal prey on? Lizards, non-poisonous snakes

Where does my animals live? United States of America

What are some predators of my animal? Hawks.

Allan Justin
